

## 1: Plugging in a Microphone

- Plug in microphone into central input in front of the stage

- Plug cable labeled "Mic 2" into the mixer

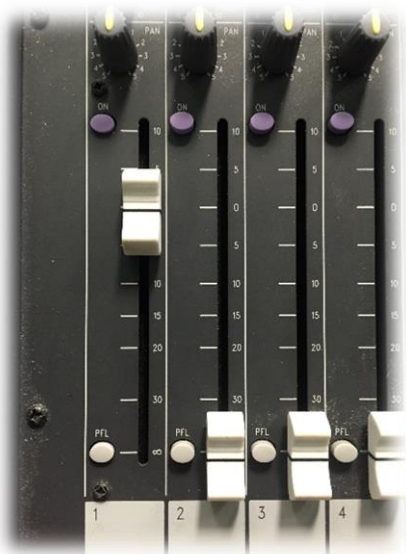

## 2: Setting the Levels

- Move to the U (unity gain) position. This knob controls the sensitivity of the mic
- Ensure that the button is pressed down
- Set the next 4 knobs to the 12 o'clock position
  - First knob: High/Trebel frequencies
  - Second & third knob: Mid Vocal frequencies
  - Fourth knob: Low/Bass frequencies
  -

## 3: Setting the Volume

- Ensure that purple button is pressed down
- Set the slider to the '0' position and change according to preference

## 4: Outputting to Speakers

- Plug in 2 XLR cables into the mixer and then plug them into Channel A & B of the amplifier
- Plug in the SpeakON Cable label "Main" into The Bridge (Central) plug
- Turn on the amplifier by pressing the power button
- Turn the Channel A & B level knobs all the way to the right

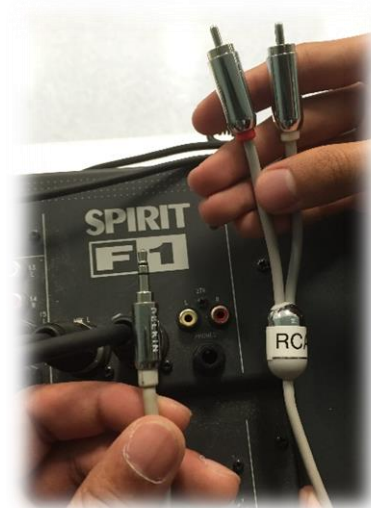

## 5: Setting Main Volume

- Set both of the main volume sliders according to preference

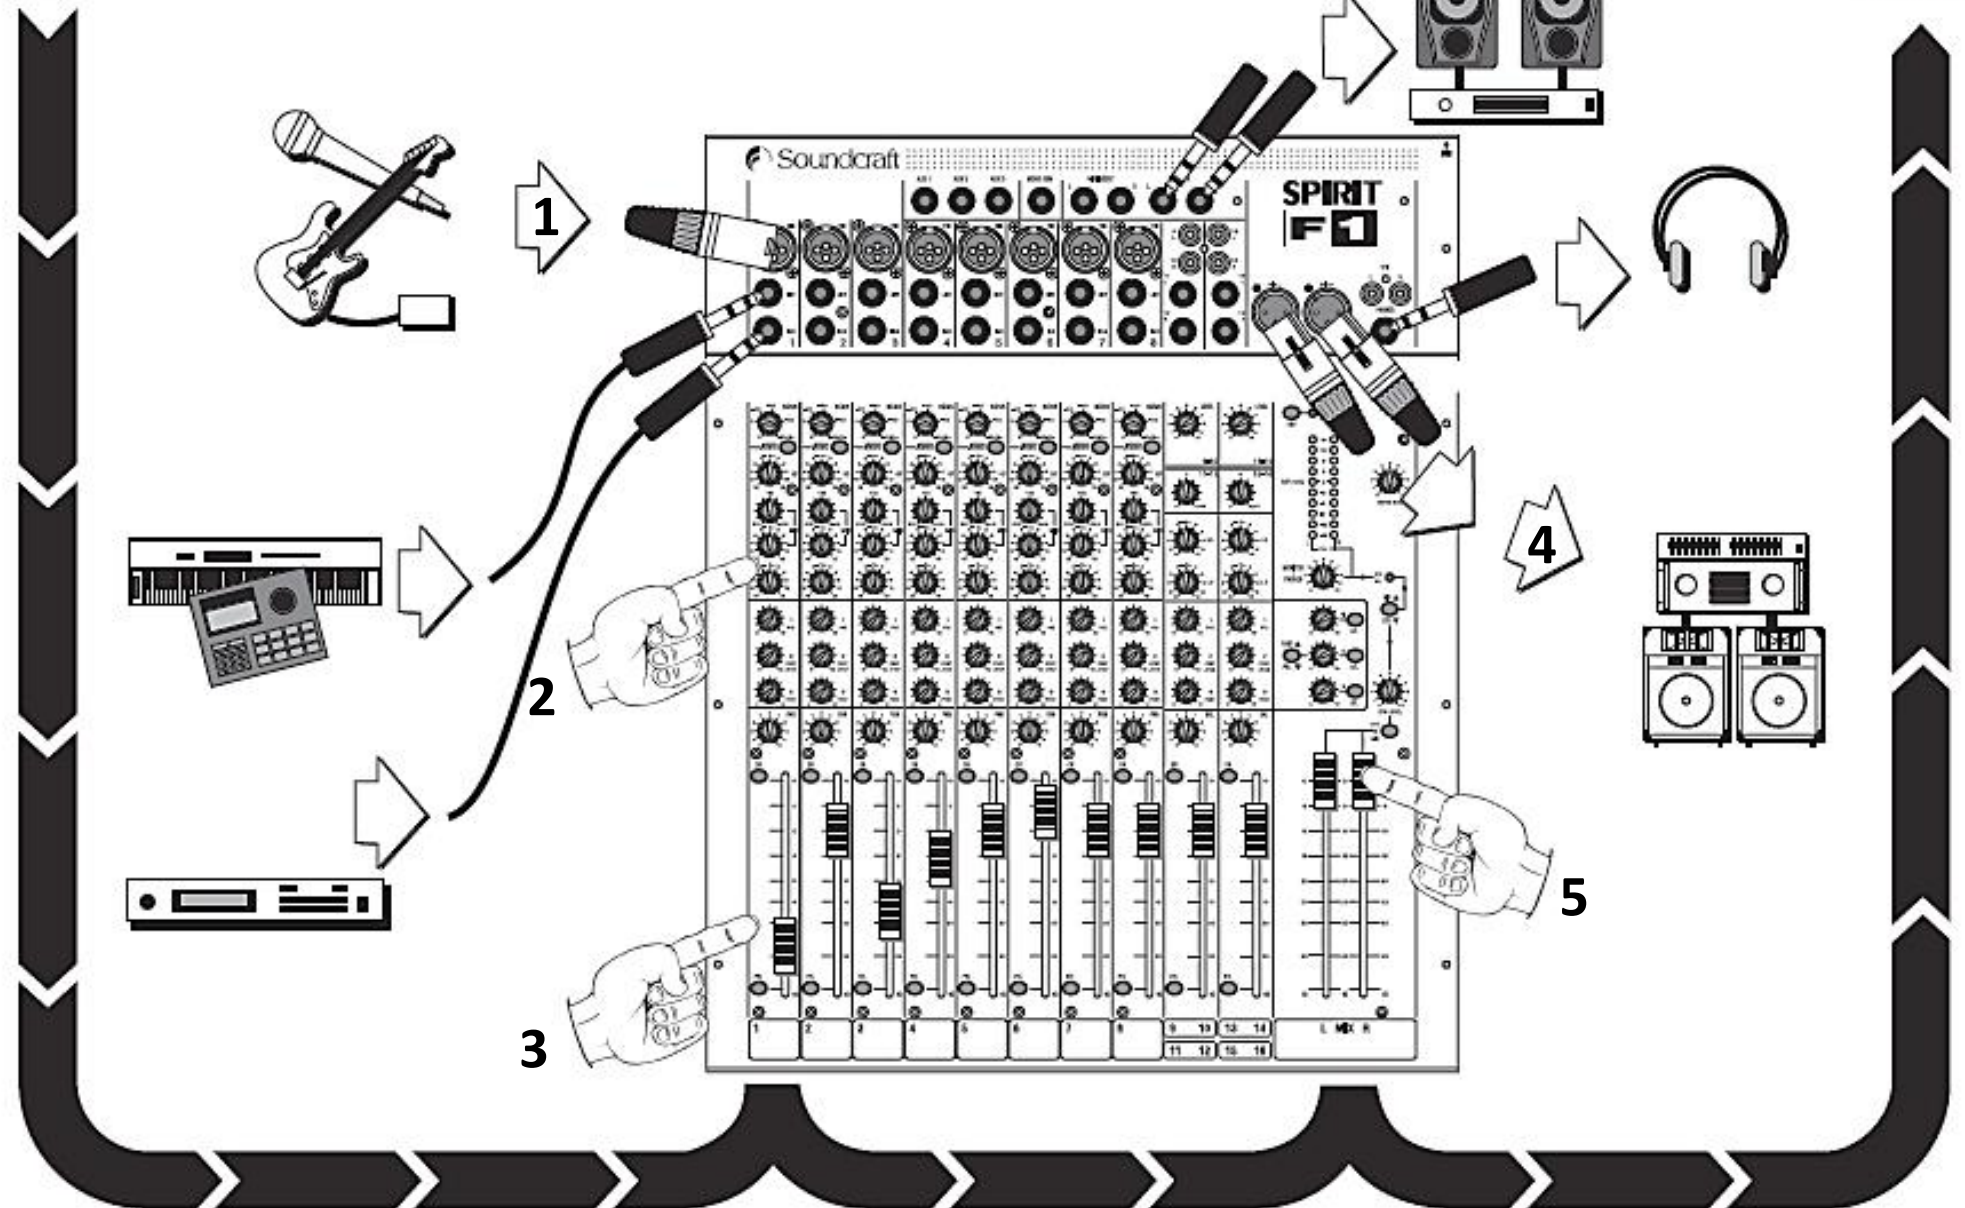

## Miscellaneous

- To plug in an audio device such as a phone/laptop find cable labelled RCA → 3.5
- Plug it into the 2TK Input on mixer
- Ensure that "2TK to Mix" button is pressed down
- Turn the "2TK Level" knob to adjust volume
